I don't know why didn't I write an actual review of ETS2 yet. I have it for three years now and I still have my positive thoughts about it. I love that it is constantly evolving and new dlcs are being added! This is the only game that I am willing to add dlcs and I think it's also the one that I've spent the most amount of money. AND I didn't regret it! SCS is one of the best game studios out there. I've known them since I was eight years old - it's Bus Driver what was my first experience.

About the game: It's a usual truck driving sim with a full company management part. Or is it? It has a highly detailed map of Europe (which is still being developed) with real objects and sights! The gui is easily usable the ai is great and the whole game is a unique experience! I could go into the details what else it has, but overall: TRY it! It will be a good choice and you'll be addicted to it! When you get bored, you may go for achievements or download the multiplayer plugin. Trust me, you won't put down this game. I'm playing it since 2016 April and it's still my favorite game!. 10/10 Would kick dogs again. This game is hilariously bad but it's got it's own little charms. It's nice being able to specify what animals should spawn on your map, along with the amount (low, mid or high). The graphics have a lot to be desired and look more like it's made in 1999 rather than 2009. As hunting sims go, it's extremely easy to shoot animals in this game, not so much to find them, especially on bigger maps. However, a lot of the time the animals will run right at you or around you, allowing you to shoot them.

I still enjoy this game for what it is, although the controls are a bit annoying, having no auto-run feature is wrist-cramp heaven! Pluses are the fact you get ALL the weapons and animals from the start, and it's cheap enough to waste a few hours on.

If this is your first hunter sim, avoid this one - I've been playing theHunter for a long time now and if anyone is looking for a good hunter sim, try that instead!. There was a hole in my life, that could only be filled by tying things up and practicing japanese rope bondage. Thank god someone made a puzzle game that fulfills this disturbing and sexy need.. Tactical combat, a well-designed skill system that allows "multi-classing" between martial and magic skills that ACTUALLY works, plus emotionally-invested character story arcs?

DOS2 is the the triple threat.. Great game, easy to play, Bladerunner like. Runs fine even on my laptop.. I bought the game on sale, then after an hour or so of gameplay, asked for a refund. It's not because it's not a good game, but because it has too many things I'm looking for that is not yet available at this early stage of the game.

It would be great to have a co-op adventure, not just a multiplayer battle mode-- what I was looking for at this time as I was looking for something to play with my non-gamer wife.

To be fair, I still recommend the game. To be fair, I still will look forward to buying the full "explosive" potential of the game, but just not now.

It still is a lovable game and is the best Bomberman-like type of game I have seen and played on different platforms.

. This game is nowhere near ready for release, especially for VR. The performance is poor on a GTX1070, the camera angles are not designed for VR (the entire world is tilted like in a regular desktop RTS, but in VR I can just tilt my head, I don't need the camera to be tilted already). The camera movement is very nauseating and not based on the direction you are looking. The graphics are nice and gameplay is pretty standard RTS (like original C&C level) and it's fun to see your army in VR. Maybe one day if the game is significantly improved it will be playable but at this point it's just far too early to call it a release or even early access.. Way too short, but interesting.

Played less than an hour atm, but like it already.

Rooms: The Unsolvable Puzzle reminds me Spooky Door on mobile, but this game is much better; graphics and in-depth puzzles

Highly recommended!. The game is a fairly short point and click story based around european folk tales. A child is sick and the king hires a hero to go and find a cure. It's quick, it's straight forward, and it's a decent 20 min experience.

Things you might consider before purchasing however are -

It does contain nudity, not sexualized but just normal nudity. (A question could be asked WHY it's there as it doesn't add or subtract from the experience in any way).

I found one area to be particularly jarring and completely out of place in a world of small thatch villages and king's castles, why does the sword wielding hero get to the exploration site on a bus?

I think the best way to summarize my view would be that it seems like a person telling a story rather than a story that flows from a mechanics stand point and the things that made it from a bedtime story to a playable game subtract from the experience as a whole. Should you buy? ... i liked it's premise so for a dollar yes i would say so.. Decided to have a go at it since it wasn't expensive. Disappointed. I found the actual "Golf" aspect of it to be far too easy, eagling 2 of the first 3 holes and birding the other. Where is my RPG in that? The RPG element was more of a Zelda style top down combat, but with horrible combat controls, moves which were all but impossible to avoid, and no simple way to block (you have to time your golf swing with their attack to block it, and there is no dodging).

On top of all this the keys are mapped poorly, and there is no indication of which keys to use to even start the game. For future reference, use the arrow keys. Z = action or attack, X = magic or cancel, C = character screen, D = Map. I couldn't even start a new game without randomly hitting keys.

Wont be playing this game again after dying to the frog.. I like this game more than I like some other games.. I am surprised I didn't leave my thumbs up here.

Root Double is amazing visual novel. Great worldbuilding, memorable characters, phenomenal storytelling; I can't stress it enough! And too bad I can't really explain 'why' without spoiling all the fun exploring this game.Let me put it this way - feel free to treat Root Double as a slow paced murder-ish(?) mystery because you will find your answers only in the end. It was a rollercoaster of emotions for me personally and was damn worth it.

And it has full VO!

Brave\_decision.mp3. Fun gameplay and would be amazing with multiplayer.. Wonderful music, amazing visuals, touching story. This game should be a point of reference for all art games, both on mobile platforms and regular gaming systems. More than a game, it's a life experience. Completing this game is something you will never forget. Cosmic friends forever.. For £34.79 on sale I decided to wing it and give the Class 319 a try. The train is decent to drive but once again the sounds are recycled from the Class 455. Get the AP pack alongside this!

If you have the London to Brighton route it includes 2 new scenarios but none for the Chatham Main Line or South London Network! Unfortunately the scenarios on the workshop require you have the London-Faversham, South London Line and Class 378 packs additionally so for some that will be a disappointment!

Overall, 6/10 for the standard DLC. 8.5/10 for the DLC + Armstrong Powerhouse pack.. "Hello..."

"Hello..."

"Farts"

"He he he"

"Follow me"

"Okay..."

Childhood restored. Is it that good you ask?...why yes..yes it is. This may well be in the top 5 twin sticks I've played and yes I've played alot over the past 35 years of gaming starting with Robotron at the age of 4. Excellent core mechanics, innovative enemies, simple controls, and beautiful audio coupled with high sensory graphics equals instant gameplay addiction. LOVE the auto turret and overheating mechanic. If you have any remote interest in twinsticks get this game!

P.S. The music is simply amazing as well!
